

Product Description

Cutterhead with HSK-85WS clamping, precisely balanced for higher rotation rate and feeding speed — delivering exceptional accuracy in planing and profiling.

Maximum Operation Speed: 12000 rpm

Finger joint knives sold separately

Highlight Features

1. The HSK clamping system provides superior rigidity and pinpoint positioning accuracy in every application;
2. Durable to withstand continuous operation on high-speed moulders at a high feeding rate;
3. Fast tool changes and full compatibility with automated production systems;
4. Customizable with a wide range of inserts to suit different processing requirements.

Product Specifications
